POTENTIAL NOROVIRUS OUTBREAK AT LTC

Benton-Franklin Health District is investigating a potential norovirus outbreak at a long term care facility in the Tri-Cities.

Gastrointestinal symptoms may be seen with either COVID-19 or norovirus. If providers are evaluating patients from long term care facilities presenting with gastrointestinal symptoms, consider diagnostic testing for norovirus through commercial laboratories.

Please report any norovirus cases associated with long term care facilities to 509-539-0416 or fax to 509-460-4377.
