COVID-19 Therapeutics Information for Health Care Providers

Access to information, resources and guidelines

The Washington State DOH [Therapeutics Information for Health Care Providers](#) webpage is for health care providers and local public health in Washington state to access resources, guidelines, and information regarding the distribution, access, and clinical use recommendations of state allocated COVID-19 oral antivirals and monoclonal antibodies.

Providers can visit the [Information for Health Care Providers](#) webpage to access the following resources:

- COVID-19 Therapeutics Fact Sheets (Evusheld, Paxlovid, Monupiravir, etc)
- Interim guidance and clinical resources for the use of COVID-19 therapeutics for Washington State
- State resources for COVID-19 therapeutic distribution, ordering, administration, and allocation process.
- Federal resources from the National Institutes of Health (NIH), Center for Diseases Control and Prevention (CDC), Federal resources from the Human and Health Service Administration (HRSA) and Federal Drug Administration (FDA) Additionally, providers will be able to be frequently updated on the following information:
 - Updated COVID-19 Treatment Allocation Data for Washington State
 - Therapeutic locators and maps for oral antivirals and monoclonal antibodies
 - Instructions for new providers seeking COVID-19 therapeutics.
 - HHS updates

Patients or the general public can be directed to the [COVID-19 Therapeutics](#) webpage.
